Dear Sir:

Applicant hereby addresses each of the arguments raised by the Examiner.

With respect to the rejection of *Montes* in view of *DeWitt*, the Examiner fails to address Applicant's argument that *DeWitt* teaches away from *Montes*. Moreover, the contention that one of ordinary skill in the art would employ multiple protruding connecting members on the same panel fails to support the contention that both of these connecting members be snap-fit connectors. Accordingly, the rejection is improper.

With respect to the art rejection of *DeWitt* in view of *Montes*, the Examiner makes two inconsistent assumptions: first, the Examiner contends that the snap fit connector of *Montes* is functionally equivalent to the connector of *DeWitt*; and second, snap-fit connectors would provide a more secure attachment. It does not make sense for the connectors to be both functionally equivalent and one type of connector be better than the
